Yet there will be one other right, —the right to emigrate. Emigration or slavery.

The English troops in India have taken possession of Al Musjid a strong point in Khyber Pass, twenty-five miles from Peshawar and the Amer is reinforcing Canada and Jillahabad. Let our young readers rub up their geography as the indications are strong for a war in a country little known.

THE ONLY REMEDY.

Follies turn sometime into tragedies, and the settlement of the Rio Grande is a boundary between a civilized and semi-civilized nation, was a folly of the first water.

There always has been, is and always will be an irrepressible antagonism between two such nations owing to the nomadic plundering propensities of the latter, and a boundary line, as purely speculative as a river, which offers no obstacle to excursions of border savages and nomads involves perpetual frays, conflicts and plunderings together with a constant expense on the part of the civilized party of the first part, with the probabilities of eventual war, springing out of mutual exasperations. The Chinese recognized this fact by building an immense wall between themselves and the pug-nosed Tartar, the Romans, the wisest of men, recognized the same truth in building a wall between them and the wild tribes of Scotland, a wall mountain has been an accepted boundary between nations at all times, and yet our forefathers violated every principle of statesmanship in fixing a little muddy stream, and an indiscernible line of latitude on broad plains between those two nations. It was a folly involving a persistent tragedy. To repair that folly at the earliest moment would be wise statesmanship. The only policy before the county is to readjust the boundary line between Mexico and the United States, till it shall conform to nature and common sense. Chihuahua, Coahuila, Nuevo Leon and Tamaulipas belong to the United States, by the right of nature and necessity, and in their absorption alone is the frontier tributes susceptible of permanent adjustment.
